

## Saves Contractors Time! New Prefab Manifold Kits for AquaBalance Boilers

Weil-McLain now offers two versions of prefabricated manifold kits for the AquaBalance Series 1&2 gas boilers.

Not only do they save contractors time, the new AquaBalance Easy-Up Manifolds take the guess work out of the near boiler piping design, while insuring proper flow through the boiler and proper set up of the primary/secondary piping requirement.

Our high-quality manifolds feature dielectric unions, shut off valves, a relief valve (combi), and ports for a drain valve and servicing.

### **Benefits to the contractor include:**

- ✓  **Saves Time** - ready to install design reduces average installation time by up to two hours
- ✓  **Piping Errors** - manifolds designed & engineered exclusively for AquaBalance, no call backs associated with near boiler piping flow issues
- ✓  **Professional Appearance** - neat joints, top-quality components, precise

measurements

✓  **Priced Right** - a true value when considering the cost of all components, assembly time, and opportunity to quickly move on to other installation steps

In stock now and available for immediate shipping!
