

**TO:** All Weil-McLain Distributors and Agents  
**FROM:** Mike Boyd – Product Marketing Manager  
**SUBJECT:** *Ultra* “Easy-Up” Manifolds

***Installing an Ultra Gas boiler just got Ultra easy!***

The new Ultra Easy-Up Manifolds take the guess work out of the near boiler piping design, while insuring proper flow through the Ultra boiler and proper set up of the primary/secondary piping requirement.

Our high-quality manifolds feature dielectric unions, shut off valves, a relief valve, check valve, and take-offs for domestic hot water connections now, or in the future (*circulators come standard with every Ultra boiler*). Benefits to the contractor include:

- **Professional Appearance** - neat joints, top-quality components, precise measurements
- **Eliminates Piping Errors** - manifolds are designed & engineered exclusively for the Ultra
- **Save time** - ready to install design reduces average installation time by up to two hours
- **Priced Right** - \$200 less than the cost of all the components, plus assembly time

**Ultra Easy-Up Manifolds are in stock and available for immediate shipment:**

Part # 383-500-649 1 ¼” Ultra Easy-Up Manifold (for Ultra Gas models 80 & 105) Trade Price \$418

Part # 383-500-661 1 ½” Ultra Easy-Up Manifold (for Ultra Gas models 155-399) Trade Price \$435
